Rep. Michael G. Fitzpatrick (R-PA)

House · Republican (most recent term) · PA-8 · in Congress 2005–2017 ·
Bioguide ID F000451

Party history: R 2005–2017. Source: term data in [unitedstates/congress-legislators](#) (CC0);
party shown is as recorded per term there.

Estimated net worth (from public disclosures)

Estimate	Report year	Low	Mid	High
(a) Estimated net worth at the earliest available report (2013); the member entered office earlier, in 2005	2013	– \$108,963	\$298,018	\$704,999
(b) Latest net worth estimate	2015	– \$123,964	\$265,518	\$654,999
(c) Estimated gain / loss, nominal dollars, 2013 → 2015 (2 years spanned)	2013– 2015	– \$828,963	– \$32,500	+ \$763,962

Gain Low = latest Low – earliest High; Gain High = latest High – earliest Low (widest possible spread); Mid = latest Mid – earliest Mid.

Note: earlier annual report(s) for 2012 exist but could not be used for net worth (scanned/not computable), so the 'earliest' figure is the earliest computable one.

Reliability flags (net worth): short span (2 yr). **Not in the recommended dollar-gain ranking** (shown only in the full list).

Net worth by report year (mid; Low–High)

Report year	Assets (mid)	Liabilities (mid)	Net worth mid	Low ... High	Status / flags
2012				not available	validated OCR of a scanned filing: Schedule A is usable, but Schedule D (liabilities) is not parsed from scanned filings, so net worth is not computed
2013	\$485,518	\$187,500	\$298,018	–\$108,963 ... \$704,999	computed
2014	\$453,018	\$187,500	\$265,518	–\$123,964 ... \$654,999	computed

2015	\$453,018	\$187,500	\$265,518	-\$123,964	computed
				... \$654,999	

- **What this is:** Net worth = Schedule A assets (each value range at its midpoint; low–high range shown) minus Schedule D liabilities (midpoints / ranges). **Low** = assets at range floors minus liabilities at range ceilings; **Mid** = midpoints; **High** = assets at ceilings minus liabilities at floors. Low and High are outer bounds of the reported ranges, not likely outcomes.
- **What it excludes / understates:** exact values (only ranges are reported); a **personal residence is not reported as an asset** (although a mortgage on it may be listed as a liability, which then lowers the estimate); retirement and federal accounts (e.g. Thrift Savings Plan, defined-benefit pensions) are only partly or not reported; assets of excepted/blind trusts, cash held below reporting thresholds, vehicles, household goods and most spouse/dependent items exempt from reporting are not included; liabilities on a personal residence, revolving credit under thresholds and loans to family may be omitted by filers.
- **Open-ended top ranges** (e.g. "Over \$50,000,000") are counted at their **lower bound** and flagged, so such values are understated.
- The change is a change in **estimated net worth in nominal dollars** (no inflation adjustment). It includes salary, gifts, inheritances, business income and re-valuation as well as investment results, and it is subject to range-bracket noise; it is **not** an investment return and implies nothing about conduct.

Read this first. Members report asset values only as *ranges* (e.g. "\$15,001 – \$50,000"), never exact dollars. Every figure below is an **estimate** computed from range midpoints, not a measured return. Figures cannot be interpreted as investment performance, and they do not show wrongdoing or skill. Methodology and limitations are at the end and in the project README. Sources: public financial disclosure reports filed with the Clerk of the U.S. House of Representatives and/or the Secretary of the Senate (Senate eFD), linked below.

Limited data – not ranked. Only 2 comparable year-pair(s) could be computed (minimum 3 to rank). 4 annual filing(s) were usable (text-readable, validated OCR, or validated X-mark decoding) and 0 scanned/image-only filing(s) could not be used (older layouts failing validation, small amendments not integrated). See the method-per-year section below.

Estimated year-over-year change

Bars: midpoint estimate; whisker: same-position floor/ceiling band. Axis clipped to -100%...+150%. Years with insufficient traceable holdings are omitted.

Year (t-1 → t)	Opening value (mid)	Closing value (mid)	Income (mid)	Buys (mid)	Sales (mid)	Est. gain	Same-position band	Strict envelope	Traced coverage	Status / flags
2012→2013	\$104,505	\$201,508	\$0	\$72,503	\$0	+23.4%	+18.9% ... +58.3%	-241% ... +288%	32%	excluded; not eligible: traced coverage 32% < 60%; OCR-derived (scanned filing; validated, see method) - years 2012; many new/exited positions
2013→2014	\$437,017	\$413,016	\$0	\$64,502	\$56,502	-7.3%	-8.2% ... -2.9%	-158% ... +143%	90%	counted
2014→2015	\$420,518	\$412,517	\$0	\$24,002	\$32,002	+0.0%	+0.0% ... +0.0%	-150% ... +150%	93%	counted

Filings used

Each annual-report year uses one filing (most recently filed version among originals/amendments whose Schedule A row count is ≥ 40% of the largest). Electronic (text) PDFs are parsed. Scanned/image-only filings are OCR-read and used **only** if they pass the explicit validation gates described in the project README (value/income coverage, two-engine agreement, exact bracket snapping, page completeness, year-to-year position continuity); such years are labelled **OCR-derived** below. Scanned filings that fail validation are listed as “insufficient data – scanned”.

Report year	Doc ID	Type	Filed	Schedule A rows	Rows with unparsed value	Source (official filing) / SHA-256

Method (summary)

1. Schedule A asset rows are read from each annual report; the dollar range for each row is converted to its midpoint. Open-ended top ranges ("Over \$50,000,000") are excluded from the traced set and counted as a coverage loss.
2. Positions are matched year to year by owner code (self/SP/DC/JT) + normalised asset name. A position that appears only in year t is included only if Schedule B shows a purchase of it in year t (opening value 0); a position that disappears is included only if Schedule B shows a sale (closing value 0). Otherwise it is excluded as unexplained.
3. Estimated gain = (closing – opening + reported income – purchases + sale proceeds) ÷ opening, all at midpoints, for the traced positions. "Capital gains" income is not added again (it is already in value change and sale proceeds).
4. A year counts only if traced opening value ≥ \$50,000 and traced coverage ≥ 60% of the opening midpoint. A member is ranked only with ≥ 3 such years (exactly 2 = "limited data", shown but unranked). Average = geometric mean of (1+yearly estimate).

Limitations

- Ranges are wide (up to a factor of 5 or more, and up to \$50M+ open-ended); a holding can move between ranges without any real change in value, and stay in a range while moving materially. Yearly estimates are therefore noisy; the "strict envelope" shows the mathematical worst/best case and is typically wider than ±100%.
- Purchases and sales are only disclosed as ranges and only for transactions over \$1,000; partial sales, dividend reinvestment, spousal/dependent accounts and retirement-plan funds are reported inconsistently. Excepted/ blind trusts, personal residences and certain pensions are not reported at all.
- Filers sometimes change how they list assets (e.g. listing a brokerage account vs. its individual holdings), which can make positions untraceable across years; these are excluded rather than guessed.
- Asset values in an annual report are as of Dec 31 of the reporting year; the report year t-1→t covers that calendar year. Late or amended filings are used when filed; extensions can delay them.

- The text of these reports is machine-parsed from PDFs; parse errors are possible. Every number links back to the cited filing. This is not investment advice.
- Use of these filings is restricted by 5 U.S.C. § 105(c) (no unlawful, commercial or credit-rating purpose, and none for solicitation of money).
